

Patient Care Coordination Services

Press Release—For Immediate Distribution

TRUSTED CARE, CLOSE TO HOME..... AND AWAY!!

We know that it can be difficult to manage multiple appointments, travel arrangements and time away from work when you are scheduling with out of town healthcare providers. We're here to help. Greeley County Health Services is pleased to introduce **Patient Care Coordination Services**.

Designed to help our patients navigate difficult healthcare issues, this program will offer chronically and seriously ill patients a resource for coordination assistance and understanding the exchange of your healthcare information. This program is staffed by Burlay Parks, R.N. who can meet with patients and their families as you work with your primary care provider and outreach providers to seek care for health concerns.

Burlay will be available several days a week in each clinic location. Please call the clinic to schedule an appointment with Burlay or ask your healthcare provider if you would benefit from these services. This program is made possible through a grant from the Robert Wood Johnson Foundation. Chrysanne Grund, Project Director says, "We are so pleased to be able to offer additional support for our patients who are working through difficult health issues, travel schedules, work and family."
